Summary of Qualifications

- **3+ years of experience** in **Flutter** and FlutterFlow, building scalable and high-performance mobile applications.
 - **1+ years of experience** in Node js during tenure at Bytevia Solutions, working on both Flutter and Node js projects simultaneously.
 - **Expertise in Firebase and API integrations**, utilizing Firestore, Realtime Database, and third-party services for seamless backend communication.
 - **Strong proficiency in state management** using GetX, Riverpod, Provider, and Bloc to optimize app performance and maintain clean architecture.
 - **Skilled in cloud infrastructure** with Firebase and Google Cloud, ensuring security, scalability, and efficiency.
 - **Proficient in payment gateway integration**, including Stripe, , Revenue Cat , to enable secure transactions.
 - **Commitment to performance optimization, code quality, and security**, with the ability to quickly adapt and solve problems in dynamic team environments.
-

Education:

Bachelor's in Software Engineering (2019 - 2023)
Comset Uiniverity ,islamabad, Pakistan

Tools & Technologies:

- **UI Frameworks & Libraries:** Flutter,
 - **State Management:** GetX, Provider, Riverpod,
 - **Backend Services & BaaS:** Firebase (Firestore, Realtime Database, Authentication, Cloud Functions), node js, Appwrite
 - **Database Systems:** Firebase Firestore, SQLite, Hive, Monogo db
 - **API Tools & Services:** REST API's, Postman, AWS API's
 - **Authentication & Authorization:** Firebase Authentication, OAuth, Auth0, JWT, Supabase Auth
 - **Animation Libraries:** Flutter Animations, Rive, Lottie
 - **Code Hosting Platforms:** GitHub, GitLab, Bitbucket, AWS CodeCommit
 - **CI/CD Tools:** Codemagic, GitHub Actions, Firebase App Distribution
 - **Payment Integration:** Stripe, ,Revenue Cat
 - **Stateful & Serverless Backend Services:** Firebase Functions, AWS Lambda, Cloudflare Workers
-

Professional Experience

**Microcorporate Technologies - Pvt Ltd – Flutter Developer | Team Lead (Full-
Present · 1 yr** Sep 2023 -

- Lead the development of AI-powered mobile applications using Flutter and Dart.
- Developed modular and reusable UI components, improving development efficiency by 25%.
- Collaborated with cross-functional teams to deliver high-quality, fully integrated mobile solutions.
- Contributed to top-tier live products like Manthor-Marriage.

AxionTri Labs – Flutter & React Native Developer Aug 2023 - Aug 2024 ·

- Led the development of scalable and high-performance mobile applications using **Flutter**
- Designed and implemented efficient state management solutions using GetX, Bloc, improving app responsiveness.
- Developed modular and reusable UI components, reducing development time by 30% and enhancing user experience.
- Integrated apps with backend services (Node.js, Express.js, MongoDB) to ensure seamless data flow and real-time updates.
- Collaborated with cross-functional teams to deliver feature-rich, high-quality mobile applications on time.

Bytevia Solutions (Flutter)

2025 - Present

- Developed and optimized cross-platform iOS & Android apps using Flutter & Dart for smooth performance and native-like experience.
- Managed app state efficiently using **Provider**, **GetX**, and dependency injection for scalable architecture.
- Integrated **Firebase** services (Authentication, Firestore, Storage, Push Notifications) for user management and real-time updates.
- Implemented **offline functionality** with local storage, data caching, and download features similar to YouTube.
- Integrated **in-app purchases** and managed subscriptions via **RevenueCat** for iOS.
- Applied **clean code principles** and abstract classes to enhance reusability and maintainability.
- Optimized performance and resolved UI/UX issues across various devices and OS versions.

Projects

Digestrack (Flutter)

Jan 2025 - Present

Track your food's journey with DigestTrack™! Visualize digestion, optimize nutrition, and reach your health goals—weight loss, muscle gain, or better gut health!

Features: Track meals and see their digestion timeline - Visualize nutrient breakdown and absorption - Log food, exercise, and bathroom activity - See what's happening inside your body in real time to understand your health better - Get more insights to make better decisions about your health

Skills: FlutterFlow · Firebase · google Auth · RevenueCat · Firebase Crashlytics · Firebase Analytics · REST APIs

Baraka – Crowdfunding & Donation App (Flutter)

Sep 2024 - Dec 2024

Baraka is a global crowdfunding platform designed to support creative and socially beneficial projects. The app allows users to donate to various communities in need, helping bring impactful initiatives to life. Each community has a set donation goal (e.g., \$10,000), and users can contribute any amount towards that goal. With a transparent donation system, Baraka ensures that funds reach the right causes while maintaining user engagement through profile management and donation tracking

Skills: Flutter, Dart · GetX · Stripe API, PayPal AP · APIS (Authentication, donation)

powerTracker – (Flutter)

Feb 2023 - Nov 2023

PowerTracker is a cross-platform mobile application developed with Flutter. It provides users with a seamless experience to view billing portals and external content securely within the app. The app features secure WebView integration, monetization through Google AdMob, and prioritizes fast performance. It is available for download on the Google Play Store

Skills:Flutter · Firebase · REST APIs · Push Notifications · Geolocation

Pop-Up – Vacation Rental App (Flutter)

Apr 2022 - Feb 2023

Pop-Up is a modern vacation rental platform designed for seamless booking and property management. The app allows travelers to discover and book unique stays, while hosts can list and manage their properties effortlessly. It includes real-time chat between guests and hosts, secure payment integration, and location-based recommendations. The user-friendly interface ensures a smooth browsing and booking experience.

Skills: Flutter, Dart · GetX · Firebase (Firestore, Firebase Authentication, Firebase Functions) · Google Maps API, Stripe Payment Gateway

Fidarii – (Flutter)

Developed a cross-platform service booking app for Android and iOS featuring a multi-level selection process. The app integrates real-time features like date/time slot selection, Google Maps, and in-app chat. It supports bookings for self or others, includes promo codes, and provides full booking management with real-time status tracking and notifications via Firebase

Skills: Flutter, · REST APIs · Node.js · Firebase · Stripe API

Myth Fit – Fitness Tracking App (Flutter)

MythFit is an AI-powered fitness app that generates personalized workout plans tailored to your goals, equipment, and fitness level. It provides video-guided exercises, tracks your progress, and adapts your training plan over time — offering a complete personal training experience from your smartphone.

Skills: Provider · Flutter, Dart · Firebase (Firestore, Firebase Authentication)

Rel8.app – Family Connection & Memory Sharing App (Flutter)

Rel8.app is a leading innovative app bridging the digital divide between carers, loved ones, and their families. We believe in the simplicity of our app and the ease of use for our users. Easily snap photos and upload them to share memories with loved ones. Let the picture tell a story and keep that story forever in the hearts of your loved ones.

Families and care communities (aged care, disability care, home care, and retirement communities) now have a better experience, reconnecting and bringing families together through Rel8.app.

Skills: Flutter, Dart · Firebase · Firebase (Firestore, Firebase Authentication, Firebase Functions) · Push Notifications
